Continuation of 11, does NOT place the application in condition for allowance because: the limitations "the other inverter transformer of the pair of inverter transformers is positioned in close proximity to the other end of the fluorescent tube, the length of a connection between the one inverter transformer and the one end of the fluorescent tube being substantially shorter than the distance between the one inverter transformer and the other end of the fluorescent tube, and the length of a connection between the other inverter transformer and the other end of the fluorescent tube being substantially shorter than the distance between the other inverter transformer and the one end of the fluorescent tube being substantially shorter than the distance between the other inverter transformer and the one end of the fluorescent tube for supplying the high voltages to the fluorescent tube" recited in independent claim 87 require further consideration and/or search.

The limitations " the other inverter transformer of the pair of inverter transformers is disposed near-in close proximity to the other end of the fluorescent tube, the length of a connection between the one inverter transformer and the one end of the fluorescent tube being substantially shorter than the distance between the one inverter transformer and the other end of the fluorescent tube, and the length of a connection between the other inverter transformer and the other end of the fluorescent tube being substantially shorter than the distance between the other inverter transformer and the one end of the fluorescent tube." recited in independent claims 88 and 94 require further search.

The limitations "the length of respective connections between the second plurality of inverter circuits and the ends at the other side of the fluorescent tubes being substantially shorter than the distance between the second plurality inverter circuits and the ends at the one side of the corresponding fluorescent tubes." recited in independent claim98 require further search.
